Last Updated: 2020-04-20 by Shanon Hudson Heath Zenith Wireless Chime by Heath Zenith -4- 595-5649-05 Troubleshooting Chime does not sound:• Make sure push button and chime codes are the same (See pages 2 and 3).• Check orientation of push button battery (See page 3).• Check push button battery charge, replace if necessary. Batteries seem OK, but the chime does not work when installed:• Do not mount chime or push button on metal or near metal studs. This reduces the transmitter range. Use 1/4" to 1/2" (6 to 13 mm) wood shims to move chimeor push button off metal surface. • Concrete floors may reduce range. Move chime away from floor. • Try locating chime closer to push button. The range of the wireless chime can vary with location, temperature and batterycondition.
